I wanna demo too...

- Let's use Generative AI to make a hack real quick.
- If you're new or you have no idea what's happening here, don't worry.
- We're going to go beyond a chat interface and let our AI run commands.
- But... as an example, we are still gonna make a chat app.

mlh.link/c-demo

- Generative AI and coding tools like what I used aren't perfect.
- This'll help you get started, it can debug, and it can build discrete features, but you need to direct it.
- Come chat with me if you're interested in learning more!

On a Serious Note...

MLH Hackathons are a Safe Space
for **Everyone**.
